THEORETICAL AND APPLIED GENETICS

Founded in 1929 under the title 'Der Züchter' as a German journal for theoretical and applied genetics and edited until 1945 by Erwin Baur; changed from a national journal devoted almost exclusively to plant breeding to an international periodical for genetics and breeding research under the same title 'Der Züchter in 1966; in 1968 to 'Theoretical and Applied Genetics'; edited by H. Stubbe from 1946 to 1976.

The exclusive copyright for all languages and countries, including the right for photomechanical and any other reproduction, also in microform, is transferred to the publisher.
